

Task ID	Owner	Priority	Task
B1	R1	High	Workflow order and reference-standard claim boundary
B2	R2	High	Human-human disagreement synthesis
B3	R3	High	Source-adjudication gap queue
B4	R4	High	M1-R results table and appendix package
B5	R1	High	SEM claim-boundary review
B6	R4	Medium	Tables/Figures reader check
B7	PI	High	Results final pass
B8	PI	High	Discussion final pass
B9	PI/R4	High	RSM/GenAI requirements crosswalk

Instruction	Status
Check that raw freeze, disagreement, source adjudication, reference freeze, and model comparison are not conflated.	Not started
Summarize coder differences by source condition, construct mapping, sample choice, statistic type, and downstream consequence.	Not started
Identify rows where source-document adjudication or page/table locator evidence remains insufficient.	Not started
Convert 2,043-row M1-R denominator-family results into manuscript and appendix-ready tables.	Not started
Confirm core-6 diagnostic language and block all-construct/all-row substitution claims.	Not started
Check table order, captions, figure fit, and reader-facing interpretation.	Not started
Verify Results text against 2026-06-12 full-corpus files and 2026-06-11/12 TSSEM diagnostics.	Ready for PI review
Verify no pooled accuracy, vendor-ranking, replacement, or all-row SEM claim remains.	Ready for PI review
Complete AI-use disclosure, model access date, prompt/parameter note, code/data availability, and public repository boundary.	In progress

Item	Value
Target journal	Research Synthesis Methods
Current goal	Near-submission draft; Results/Discussion strongest sections
Official reference candidate	Paper2 Human Final Consensus v2
Full-corpus M1-R rows	2043
Allowed main claim	LLM workflow augmentation and review triage
Blocked claims	Pooled accuracy, vendor ranking, autonomous replacement, all-row SEM stability

Requirement	Current evidence
Research design	213-study source-anchored reference; 2,043-row full-corpus M1-R
Evaluation	Denominator-family accuracy, abstention, exception gates
Validation	Human reference standard and source-document adjudication
Reproducibility	Locked shards, scripts, manifests, checksums
Transparency	Claim-boundary docs

Next action
Keep dataset/subset counts explicit
Report conservative all-scorable interpretation
Add final PI-approved reference freeze wording
Refresh public repository manifest if 2026-06-12 files are public
Add final AI disclosure and model access dates
